# RAMOJU PAVAN KUMAR

**Email:** kumar091039@gmail.com | **Phone:** +91 9177245535 | **Location:** Mallikarjuna Nagar, Rajahmundry

## PROFESSIONAL SUMMARY

To secure a challenging position in a reputable organization where I can enhance my knowledge, improve my technical skills, and contribute effectively to organizational success while continuously learning and growing.

## EDUCATION

- **Bachelor of Computer Applications (BCA)** — **2023 – 2026**
  Aditya Degree College, Rajahmundry
  CGPA: 7.5
- **Intermediate (MPC)** — **2021 – 2023**
  Aditya Junior College, Rajahmundry
  Percentage: 71%
- **Board of Secondary Education (SSC)** — **2020 – 2021**
  Prathibha Educare, Rajahmundry
  Percentage: 97%

## TECHNICAL SKILLS

- **Programming Languages:** C, Python, Java
- **Web Technologies:** HTML5, CSS3, JavaScript
- **Database:** DBMS
- **Full Stack Technologies:** MERN Stack (MongoDB, Express.js, React.js, Node.js)
- **Tools:** Git, GitHub, MS Office

## SOFT SKILLS

- Leadership
- Adaptability
- Time Management
- Teamwork

## INTERNSHIP EXPERIENCE

**MERN Stack Intern | Adhoc Network**

- Worked on full-stack web development projects using MongoDB, Express.js, React.js, and Node.js.
- Developed and optimized responsive web applications.
- Implemented RESTful APIs and integrated frontend with backend services.
- Gained hands-on experience in debugging, deployment, and version control using Git and GitHub.
- Collaborated in Agile-based development workflows to deliver scalable solutions.

**Python with Machine Learning Intern | Revanth Software Solutions Private Limited**

- Gaining hands-on experience in Machine Learning concepts including supervised and unsupervised learning.
- Performing data collection, cleaning, preprocessing, and feature selection for model development.
- Implementing ML algorithms such as Linear Regression, Logistic Regression, Decision Trees, and KNN using Python.
- Evaluating model performance using accuracy, precision, recall, and confusion matrix.
- Applying machine learning techniques to solve real-world problems through hands-on mini projects.

## PROJECTS

**Risk Analysis | Hospital Appointment System** (College Project)

- Built a hospital appointment website using Python (Flask) and Machine Learning that auto-prioritizes patients based on symptom severity (Low / Medium / High Risk).
- Developed dual dashboards for Patient Booking and Doctor Management with secure login and SQLite database.
- Implemented patient data handling, appointment scheduling, and risk prediction for improved healthcare workflow.
- Tech Stack: Python, Flask, scikit-learn, pandas, SQLite, HTML, CSS, JavaScript

## CERTIFICATIONS

- MERN Full Stack – Adhoc Network
- Python – Cisco
- C Language – Infosys Springboard
- Pearson MePro

## LANGUAGES

- Telugu
- English

## HOBBIES

Reading Books
- Exploring AI Tools
